Calculating Affordability

- A holiday letting agent or valuer is to provide Low, Mid and High Season rental figures for the property. Agent's letting fees should be deducted, or assumed as being 20% of gross rents if not available or confirmed.
- We will then take an annual average of the 3 seasons' income (after agent fees) and use 70% of this figure, to allow for rental voids, when calculating the Interest Rate Coverage Ratio (ICR).
- This figure must cover the monthly mortgage payments calculated at 125% of the mortgage at pay rate i.e.

(Loan amount x interest rate x 125%) <= (Annual average of season rents x 70%)

Mortgage Product

- 3 Year Discounted Variable Rate, currently 3.65%
- Reverting to SVR, currently 5.75%
- Application Fee £199
- Completion Fee £1800 (can be added)
- Early Repayment Charge 3%
